Sustainability

As a member of the **US Green Building Council** and with **LEED TM Accredited Professionals**, Archit8 Studio is committed to this ethic. We are versed in sustainable issues that inform the design process and offer sustainable design consulting as a stand-alone service to clients and project teams alike.

It is our belief that only through an integrated & collaborative approach involving the client, its representatives and consultants, can a project be sustainable, successful, & cost effective. Preliminary cost estimates must be analyzed with long term vision to fully understand & maximize the return.
